

## **2010-2011 SCHOOL YEAR NOTIFICATION**

As a result of recent federal legislation (Asbestos Hazard Emergency Response Act - AHERA), each primary and secondary school in the nation is required to complete a stringent inspection for asbestos and to develop a plan of management for all asbestos-containing building materials. New London Schools has a goal to be in full compliance with this law and is following the spirit, as well as, the letter of the law. As a matter of policy, the district shall continue to maintain a safe and healthful environment for our community's youth and employees.

In keeping with this legislation, all buildings (including portables and support buildings) owned or leased by New London Schools were inspected by EPA accredited inspectors and samples were analyzed by an independent laboratory. Based on the inspection, the school prepared and the state approved a comprehensive management plan for handling the asbestos located within its buildings safely and responsibly.

Furthermore, New London Schools is up to date on their 3-Year Re-inspection required by AHERA. Our district buildings, where asbestos-containing materials were found, are properly labeled and maintained in a non-friable condition.

This past year New London Schools conducted the following with respect to its asbestos containing building materials:

*\*Implemented our Operations and Maintenance Program*

Federal law requires a periodic walk-through (called "surveillance") every six months of each area containing asbestos. In addition, the law requires all buildings to be re-inspected three years after a management plan is in effect. MacNeil Environmental, Inc will accomplish this under contract.

Short-term workers (outside contractors - i.e., telephone repair workers, electricians and exterminators) must be provided information regarding the location of asbestos in which they may come into contact. All short-term workers shall contact the head custodian in each building before commencing work to be given this information.

New London Schools has a list of the location(s); type(s) of asbestos containing materials found in that school building and a description and time-table for their proper management. A copy of the Asbestos Management Plan is available for review in the school office. Questions related to the plan should be directed to Brenda Hammen, MacNeil Environmental, Inc., Burnsville, Minnesota, at (920) 362-0070 or by contacting Richard Yerkey, Director of Business Services for the New London Schools.
